DIN 15018 (1984) DIN 15018 performs the static stress check and fatigue check for the steel structures of crane and crane equipment. Fatigue calculations are performed according to the Allowable Stress Design method (ASD). DIN 15018

DIN 15018 | Help | SDC Verifier for Femap

DIN 15018 is a crane code and has officially been replaced by the EN 13001. Some companies still use the DIN15018 for the structures. The code is based on the nominal stress concept. Different load spectra are included in order to adapt the permissible stress amplitudes to the service loading conditions.
