A food chain shows a direct transfer of energy between organisms. As every organism can feed on multiple things, a food web is a much more realistic and simplified method of transferring energy in an ecosystem. Both food chains and food webs are similar to each other, but they are not the same. We will explore the differences here. A food chain presents a unique, connected path of energy flow in an ecosystem, whereas the food web explains how food chains overlap.

Based on the food chain relationships denoted by the arrows in the food web diagram, label each plant/animal with one of the following labels: primary producer, primary consumer, secondary consumer or tertiary consumer. Next rank the relative concentration of DDE in each plant/animal using the following scale: 1 = lowest concentration - 10 = highest concentration. Finally, answer the five questions following the food web diagram.

Incorporate hands-on lab activities that integrate STEAM concepts with 180 days of daily practice! This invaluable resource provides weekly STEAM activities that improve students' critical-thinking skills, and are easy to incorporate into any learning environment. Students will explore STEAM concepts through the inquiry process with hands-on lab activities. Each week introduces a STEAM problem, need, or phenomena that they will address through a guided step-by-step challenge. Aligned to Next Generation Science Standards (NGSS) and state standards, this resource includes digital materials. Provide students with the skills they need to think develop problem-solving skills with this essential resource!

****This is the chapter slice "Food Chains Gr. 1-5" from the full lesson plan "Hands-On - Life Science"***** Spark curiosity in this great big world of ours by discovering how everything works and lives together with our Hands-On Life Science resource for grades 1-5. Combining Science, Technology, Engineering, Art, and Math, this resource aligns to the STEAM initiatives and Next Generation Science Standards. Dive right in by getting a firsthand look at ecosystems and building your own terrarium. Make information sheets for plants and animals, complete with hand-made drawings. Design your own food chain while grasping the knowledge about producers, consumers and decomposers. See what traits you inherited from your parents while learning about different adaptations. Learn about life cycles by studying a caterpillar's marvelous transformation into a butterfly. Explore your own brain with memory games and tracking your heart rate and dreams while you sleep. Each concept is paired with hands-on experiments and comprehension activities to ensure your students are engaged and fully understand the concepts. Reading passages, graphic organizers, before you read and assessment activities are included.

In this second edition of Hands-On General Science Activities with Real Life Applications, Pam Walker and Elaine Wood have completely revised and updated their must-have resource for science teachers of grades 5-12. The book offers a dynamic collection of classroom-ready lessons, projects, and lab activities that encourage students to integrate basic science concepts and skills into everyday life.

Traversing Walls will help you -provide core activities to physically prepare participants to climb, -challenge participants' bodies and minds at the same time, -select activities to meet your group's needs and levels, and -find activities that meet NASPE standards. Traverse wall climbing--in which most of the climbing is done horizontally--is quickly growing in popularity because it is exhilarating, challenging, and fun. Yet, specific games and activities for traverse walls have been hard to find--until now. Traversing Walls provides you with 68 engaging activities that you can use to implement traverse wall climbing. Included are these features: -Core strength activities to help kids physically prepare to climb -Dome cone and other lead-up activities to keep kids active even when they're not climbing -Traverse wall activities with cross-curricular connections that will stimulate your participants' bodies and minds at the same time--so the kids are thinking and learning while having fun on the wall The authors provide numerous suggestions for expanding on the games and ideas presented in the book, too. In fact, virtually any intellectual ability, academic task, popular game, or equipment can be incorporated into climbing activities, and many teachers have combined the activities with other subject matter, such as math and geography. The book contains dozens of activities and variations, including well-known games and those that incorporate numbers, letters, math, and

words. Some games reinforce health concepts, such as nutrition and the MyPyramid food chart, muscles and exercise, human body systems (muscles and organs), human skeletal system, and appropriate health behaviors. All of the activities promote healthy, fun, and productive learning in which everyone can succeed. The ground-level and traverse activities will help your class meet NASPE standards So go encourage your participants to climb the wall! They'll encounter physical and intellectual challenges along the way, gain strength and confidence as they acquire new skills, and have loads of fun that is connected to learning.

If your child is struggling with science, then this book is for you; the short book covers the topic and also contains 5 science experiments to work with, and ten quiz questions. The book covers the following: The First Link In The Chain Who And What Makes A Food Chain How It All Works Our Food Chain The Food Chain Is The Circle Of Life Food Chain Experiments This subject comes from the book "Fourth Grade Science (For Home School or Extra Practice)"; it more thoroughly covers more fifth grade topics to help your child get a better understanding of fifth grade math. If you purchased that book, or plan to purchase that book, do not purchase this, as the problems are the same.
