If not, you will have to use your owner's manual to find the right part number and spend some more money replacing the replacement. On top of that check your thread quality. The thread for your bobbin should be a top quality brand and construction. Inferior threads tend to leave a lot of fuzz lying around which can harm or jam your machine. My 707 was blowing fuses. Examining the capacitor pack it had split and leaked and presumably gone short circuit. I contacted Bernina who said the capacitor pack was obsolete and no longer available and that the motor would work ok without it. I have now reassembled machine without the capacitor pack and everything works fine. It is not necessary to disturb the other wiring, just pull the ...
