First year undergraduate calculus courses. The difference
between Early Transcendentals (ET) and Late
Transcendentals (LT) is the placement of logs and
exponentials (aka transcendentals) in the table of contents
and therefore where those topics are covered in the
course---either early or late. The seventh edition continues
to evolve to fulfil the needs of a changing market by
providing flexible solutions to teaching and learning needs
of all kinds. The new edition retains the strengths of earlier
editions: e.g., Anton's trademark clarity of exposition; sound
mathematics; excellent exercises and examples; and
appropriate level, while incorporating new ideas that have
withstood the objective scrutiny of many skilled and
thoughtful instructors, and their students. For the first time,
the seventh edition is available in both Late Transcendentals
and Early Transcendentals versions.

James Stewart's Calculus series is the top-seller in the world because of its problem-solving focus, mathematical precision and accuracy, and outstanding examples and problem sets. Selected and mentored by Stewart, Daniel Clegg and Saleem Watson continue his legacy of providing students with the strongest foundation for a STEM future. Their careful refinements retain Stewart's clarity of exposition and make the 9th Edition even more useful as a teaching tool for instructors and as a learning tool for students. Showing that Calculus is both practical and beautiful, the Stewart approach enhances understanding and builds confidence for millions of students worldwide.
