Overview. Chemotherapy for breast cancer uses drugs to target and destroy breast cancer cells. These drugs are usually given directly into a vein through a needle

Download File PDF Cancer Chemotherapy Handbook

or as a pill. Chemotherapy for breast cancer frequently is used in addition to other treatments, such as surgery, radiation or hormone therapy.

Chemotherapy for breast cancer - Mayo Clinic
Certain types of chemotherapy and radiation therapy can weaken the immune system, putting cancer patients at increased risk for life-threatening infections. Because of this, many cancer patients may need to get revaccinated against diseases they received vaccines for as children. And some may require additional vaccines
