The Ford Duratorq engine, commonly referred to as Duratorq, is the marketing name of a range of Ford diesel engines first introduced in 2000 for the Ford Mondeo range of cars. The larger capacity 5-cylinder units use the Power Stroke branding when installed in North American-market vehicles. The first design, codenamed "Puma" during its development, replaced the older Endura-D unit which had been around since 1984. Commercial versions of the Puma unit replaced Ford's older "York" type unit used

Ford Engines - Ford Duratorq engine (2000-)

The injectors over fueling in Ford Transit engines has become a commonly known engine problem, including with the Transit 2.2 TDCi engine. The injectors are not actually at fault, instead it is the ECU that causes the problem. The problem is that there is more diesel being delivered than required, causing issues with the engine liners.
