The processing of the timber is the next step in the value-adding chain. This can be done either at a sawmill, where it is sawn, seasoned and graded, ready to be used in building or furniture, or at a paper mill, or at some other plant for processing into chips or fibre. Forests do not only meet our timber needs.

This study points to a third role:
the provision of non-wood forest
products consumed directly and
entering markets. To guide policy-
making, several studies (Scarlat
et al., 2015 ; Ronzon and M'Barek,
2018) try to quantify the
economic importance of forestry
and other primary sectors
(agriculture, fisheries).
