This book
explores the in-

relationship
between historic-

landscape,
urban, and
regional

analyzes recent

positions and
addresses
research to
interpret legacy
values and the
necessity for
conservation
within the urban
setting. It also
presents a
method that
helps urban
planners to
implement the

Online Library L Bellissimo

suggestions,
based on
extensive
knowledge of
topographic
methods and
urban
archaeology, to
enhance the
shaping and
planning of the
historic and

evolution of
techniques and
methods that

instruments and

and territories
is now being
witnessed in

urban planning.
Actors involved

understand the
relation between

urban

is now possible
to orient—in a

origin and

This book
contains the
Proceedings of
the 2007
Conference of

the Italian
Systems Society.
Papers deal with
the interdiscipl
inary study of
processes of
emergence,
considering
theoretical
aspects and
applications
from physics,
cognitive
science,

biology,
artificial
intelligence,
economics,
architecture,
philosophy,
music and social
systems. Such an
interdisciplinar
y study implies
the need to
model and
distinguish, in
different

Online Library L Bellissimo

disciplinary
contexts, the
establishment of
structures,
systems and
systemic
properties.

Systems, as
modeled by the
observer, not
only possess
properties, but
are also able to
make emergent

Online Library L Bellissimo

new properties.

While current disciplinary models of emergence are based on theories of phase transitions, bifurcations, dissipative structures, multiple systems and

Online Library L Bellissimo

organization,
the present
volume focuses
on both
generalizing
those
disciplinary
models and
identifying
correspondences
and new more
general
approaches. The
general

Online Library L Bellissimo

conceptual
framework of the
book relates to
the attempt to
build a general
theory of
emergence as a
general theory
of change,
corresponding to
Von
Bertalanffy's
project for a
general system

theory.

With the

Cultural

attract many
visitors and
countries,
regions and
cities which

large waves of
tourists. While
an avalanche of
tourists has a

modern mass
tourism also
brings about
negative
externalities
such as
congestion,

decline in
quality of life,
low access to
cultural
amenities and
loss of local
identity; to the
extent that the
sustainability

This tourism
dilemma is

particularly pronounced in cities with a rich cultural past, such as Venice, Naples and Amsterdam. Bringing together an interdisciplinary team of leading scholars from North America and Europe, this
