REMEX presents the first comprehensive examination of artistic responses and contributions to an era defined by the North American Free Trade Agreement (1994 – 2008). Marshaling over a decade ’ s worth of archival research, interviews, and participant observation in Mexico City and the Mexico – US borderlands, Amy Sara Carroll considers individual and collective art practices, recasting NAFTA as the most fantastical inter-American allegory of the turn of the millennium. Carroll organizes her interpretations of performance, installation, documentary film, built environment, and body, conceptual, and Internet art around three key coordinates—City, Woman, and Border. She links the rise of 1990s Mexico City art in the global market to the period ’ s consolidation of Mexico – US border art as a genre. She then interrupts this transnational art history with a sustained analysis of chilanga and Chicana artists ’ remapping of the figure of Mexico as Woman. A tour de force that depicts a feedback loop of art and public policy—what Carroll terms the “ allegorical performative ” —REMEX adds context to the long-term effects of the post-1968 intersection of D.F. performance and conceptualism, centralizes women artists ’ embodied critiques of national and global master narratives, and tracks post-1984 border art ’ s “ undocumentation ” of racialized and sexualized reconfigurations of North American labor pools. The book ’ s featured artwork becomes the lens through which Carroll rereads a range of events and phenomenon from California ’ s Proposition 187 to Zapatismo, US immigration policy, 9/11 (1973/2001), femicide in Ciudad Ju á rez, and Mexico ’ s war on drugs.

Elucidates how neoliberalism rules all areas of life and operates as a form of common sense, taking Mexico as a case study. As one of the first countries to implement a neoliberal state apparatus, Mexico serves as a prime example of the effects of neoliberal structural economic reform on our sensibility. Irgmard Emmelhainz argues that, in addition to functioning as a form of politico-economic organization, neoliberalism creates particular ways of seeing and inhabiting the world. It reconfigures common sense, justifying destruction and dispossession in the name of development, and promising to solve economic precarity with self-help and permanent education. Pragmatism reigns, yet in always

Acces PDF Mexico Df Nafta Scapegoat 6 Architecture Landscape Political Economy

aiming to maximize individual benefit and profit, such common sense fuels a culture of violence and erodes the distinction between life and death. Moreover, since 2018, with the election of a new Mexican president, neoliberalism has undergone what Emmelhainz calls "post-neoliberal conversion," intensifying extractivism and ushering in a novel form of moral, political, and intellectual hegemony rooted in class tensions and populism. Integrating theory with history and lived reality with art, film, and literary criticism, *The Tyranny of Common Sense* will appeal to academics and readers interested in the effects of neoliberalism and, now, post-neoliberalism in Mexico from a broader, global perspective. Irmgard Emmelhainz is the author of *Jean-Luc Godard's Political Filmmaking*.

An analysis of contemporary violence as the new commodity of today's hyper-consumerist stage of capitalism. "Death has become the most profitable business in existence." —from *Gore Capitalism*
Written by the Tijuana activist intellectual Sayak Valencia, *Gore Capitalism* is a crucial essay that posits a decolonial, feminist philosophical approach to the outbreak of violence in Mexico and, more broadly, across the global regions of the Third World. Valencia argues that violence itself has become a product within hyper-consumerist neoliberal capitalism, and that tortured and mutilated bodies have become commodities to be traded and utilized for profit in an age of impunity and governmental austerity. In a lucid and transgressive voice, Valencia unravels the workings of the politics of death in the context of contemporary networks of hyper-consumption, the ups and downs of capital markets, drug trafficking, narcopower, and the impunity of the neoliberal state. She looks at the global rise of authoritarian governments, the erosion of civil society, the increasing violence against women, the deterioration of human rights, and the transformation of certain cities and regions into depopulated, ghostly settings for war. She offers a trenchant critique of masculinity and gender constructions in Mexico, linking their misogynist force to the booming trade in violence. This book is essential reading for anyone seeking to analyze the new landscapes of war. It provides novel categories that allow us to deconstruct what is happening, while proposing vital epistemological tools developed in the convulsive Third World border space of Tijuana.

First Published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

An account and analysis of the systematic murder of women and girls in the Mexican border town of Ciudad Juárez. In Ciudad Juárez, a territorial power normalized barbarism. This anomalous ecology mutated into a femicide machine: an apparatus that didn't just create the conditions for the murders of dozens of women and little girls, but developed the institutions that guarantee impunity for those crimes and even legalize them. A lawless city sponsored by a State in crisis. The facts speak for themselves. —from *The Femicide Machine*
Best known to American readers for his cameo appearances as The Journalist in Roberto Bolaño's *2666* and as a literary detective in Javier Marías's novel *Dark Back of Time*, Sergio González Rodríguez is one of Mexico's most important contemporary writers. He is the author of *Bones in the Desert*, the most definitive work on the murders of women and girls in Juárez, Mexico, as well as *The Headless Man*, a sharp meditation on the recurrent uses of symbolic violence; *Infectious*, a novel; and *Original Evil*, a long essay. *The Femicide Machine* is the first book by González Rodríguez to appear in English translation. Written especially for Semiotext(e) Intervention series, *The Femicide Machine* synthesizes González Rodríguez's documentation of the Juárez crimes, his analysis of the unique urban conditions in which they take place, and a discussion of the terror techniques of narco-warfare that have spread to both sides of the border. The result is a gripping polemic. *The Femicide Machine* probes the anarchic confluence of global capital with corrupt national politics and displaced, transient labor, and introduces the work of one of Mexico's most eminent writers to American readers.

How are the far-away, invisible landscapes where materials come from related to the highly visible, urban landscapes where those same materials are installed? *Reciprocal Landscapes: Stories of Material*

Acces PDF Mexico Df Nafta Scapegoat 6 Architecture Landscape Political Economy

Movements traces five everyday landscape construction materials – fertilizer, stone, steel, trees, and wood – from seminal public landscapes in New York City, back to where they came from. Drawing from archival documents, photographs, and field trips, the author brings these two separate landscapes – the material 's source and the urban site where the material ended up – together, exploring themes of unequal ecological exchange, labor, and material flows. Each chapter follows a single material 's movement: guano from Peru that landed in Central Park in the 1860s, granite from Maine that paved Broadway in the 1890s, structural steel from Pittsburgh that restructured Riverside Park in the 1930s, London plane street trees grown on Rikers Island by incarcerated workers that were planted on Seventh Avenue north of Central Park in the 1950s, and the popular tropical hardwood, ipe, from northern Brazil installed in the High Line in the 2000s. *Reciprocal Landscapes: Stories of Material Movements* considers the social, political, and ecological entanglements of material practice, challenging readers to think of materials not as inert products but as continuous with land and the people that shape them, and to reimagine forms of construction in solidarity with people, other species, and landscapes elsewhere.

For a century, economists have driven forward the cause of globalization in financial institutions, labour markets, and trade. Yet there have been consistent warning signs that a global economy and free trade might not always be advantageous. Where are the pressure points? What could be done about them? Dani Rodrik examines the back-story from its seventeenth-century origins through the milestones of the gold standard, the Bretton Woods Agreement, and the Washington Consensus, to the present day. Although economic globalization has enabled unprecedented levels of prosperity in advanced countries and has been a boon to hundreds of millions of poor workers in China and elsewhere in Asia, it is a concept that rests on shaky pillars, he contends. Its long-term sustainability is not a given. The heart of Rodrik's argument is a fundamental 'trilemma': that we cannot simultaneously pursue democracy, national self-determination, and economic globalization. Give too much power to governments, and you have protectionism. Give markets too much freedom, and you have an unstable world economy with little social and political support from those it is supposed to help. Rodrik argues for smart globalization, not maximum globalization.

Republican presidential candidate Donald J. Trump's sweeping proposals on international trade, if implemented, could unleash a trade war that would plunge the US economy into recession and cost more than 4 million private sector American jobs, according to an empirical analysis of the two candidates' trade agendas by the Peterson Institute for International Economics. Hillary Clinton, the Democratic candidate, has expressed skepticism about trade but does not advocate a change in the status quo. Marcus Noland, Tyler Moran, and Sherman Robinson employ a macroeconomic model to show that if Trump raises tariffs sharply on China, Mexico, and other trading partners, export-dependent US industries in the information technology, aerospace, and engineering sectors would be the most severely affected. But the shock resulting from Trump's proposed trade sanctions would also damage sectors not engaged directly in trade. In a separate legal analysis, Gary Clyde Hufbauer argues that there is ample precedent and scope for a US president to unilaterally raise tariffs as Trump has vowed to do as a centerpiece of his trade policy.

"The Trump Paradox: Migration, Trade and Racial Politics in US-Mexico Relations explores one of the most complex and unequal cross-border relations anywhere in the world, in the light of a twenty-first century political economy generally and the rise of Donald Trump in particular. The book examines current US-Mexico relations through state-of-the-art analysis by scholars from both Mexico and the United States, sometimes working on binational teams. Organized into four sections, the first two chapters frame the trade and migration paradoxes that inform the exploration of these issues in the rest of the book. Politics has paradoxically stirred racial resentment around immigrants just as immigration from Mexico has reached net zero and without consideration for the trillion plus contribution of Latinos to the US GD. Indeed, a dilemma for rich and aging societies like the United States is that for their
