Summary. Quickset is a simple configuration wizard page that prepares your router in a few clicks. It is the first screen a user sees, when opening the default IP address 192.168.88.1 in a web browser.

Manual:Quickset - MikroTik Wiki

Manual time zone configuration These settings are available in /system clock manual console path, and in the "Manual Time Zone" tab of the "System > Clock" WinBox window. These settings have effect only when time-zone-name = manual. It is only possible to manually configure single daylight saving time period.

Manual:System/Time - MikroTik Wiki

This document lists protocols and ports used by various MikroTik RouterOS services. It helps you to determine why your MikroTik router listens to certain ports, and what you need to block/allow in case you want to prevent or grant access to the certain services. Please see the relevant sections of the Manual for more explanations.

Manual:IP/Services - MikroTik Wiki

MikroTik is a Latvian company which was founded in 1996 to develop routers and wireless ISP systems. MikroTik now provides hardware and software for Internet connectivity in most of the countries around the world.

MikroTik Routers and Wireless – Software
