Mobile and Wireless Communications  
Networks: IFIP-TC6 ...

Mobile and Wireless Communications presents the latest developments in mobile and wireless research and the industry, with a broad range of topics including:

- Ad-hoc networking;
- Power control;
- Personal communications;
- Satellite;
- QoS;
- UMTS and wireless LANs;
- Handoffs, security and mobility;
- CDMA and physical layer including modulation and coding;
- Methods of communication functions including multiple access,

The IFIP WWIC 2019 conference takes a  
broader view to the merge of wired and  
wireless technologies and welcomes  
submissions from academia and industry  
that explore challenges and advances in  
architectures, algorithms, protocols, and  
technologies for a global wired/wireless  
Internet network.

Wireless and Mobile Networking: IFIP  
Joint Conference on ...

The Internet is being extended beyond its  
traditional boundaries through gradually  
incorporating a wide-range of challenging  
networks and autonomous devices. From  
traditional wireless networks to  
opportunistic networks of mobile devices  
in urban environments and deep-space  
communications, the new approaches  
require an efficient merging with the  
traditional wired infrastructure.
