Mathematics textbook for home schooling, private schools, and parochial schools, covering grades K thru 2 using the same methods taught for generations.

This comprehensive history traces the development of mathematical ideas and the careers of the men responsible for them. Volume 1 looks at the disciplines origins in Babylon and Egypt, the creation of geometry and trigonometry by the Greeks, and the role of mathematics in the medieval and early modern periods. Volume 2 focuses on calculus, the rise of analysis in the 19th century, and the number theories of Dedekind and Dirichlet. The concluding volume covers the revival of projective geometry, the emergence of abstract algebra, the beginnings of topology, and the influence of Godel on recent mathematical study.

The new Mathematics General syllabus describes two pathways that start in Year 11. Even though both pathways share a common Preliminary course, students taking each pathway have specific learning needs, so we have published two levels of text for both Years 11 and 12. First published in 2001 and revised in 2010, this book has been revised again for the new Mathematics General course beginning in NSW in 2013. This book caters for the Mathematics General 2 HSC course in Year 12, an updated version of the General Mathematics course. It is designed for students heading towards an HSC exam, an ATAR and university studies. This book includes access to the NelsonNet portal of resources and an interactive NelsonNetBook. Select Bonus Resource Downloads to access the PowerPoint presentation a Exploring the new Mathematics General Syllabus and a summary of course changes written by series editor Robert Yen.

New Century Maths 7-10 has been used and trusted by NSW schools for over 25 years. This proven series has been rebooted for the 2020 classroom, by featuring clear and concise explanations and showing more practical applications of mathematics. Brand-new features include explicit grading of questions, more applications and problem-solving questions, more 'flipped classroom' video tutorials and worked solutions to EVERY question. New Century Maths 7-10 is built on solid pedagogical foundations and embraces the spirit of the NSW syllabus. With numerous options for student differentiation and extra teacher support it is the most inclusive and up-to-date series.

The aim of this book is to contribute towards literature in the field of mathematics education, specifically the development of 21st century competencies amongst learners of mathematics. The book comprising fourteen chapters, written by renowned researchers in mathematics education, provides readers with approaches and applicable classroom strategies to foster skills and dispositions that will enable learners to thrive in the fast-changing and complex world that we live in today. The chapters in the book can be classified into three broad themes. The first is an examination of what is meant by 21st century competencies and how they can be developed within the context of the mathematics curriculum. The second is an in-depth discussion of evidence-based practices aimed at fostering specific competencies like metacognition and reflective thinking, critical thinking and communication skills. The last and third theme is about teaching approaches that are likely to feature increasingly in the 21st century classroom, for example flipped learning or the use of comics and storytelling. Contents:21st Century Competencies in Mathematics Classrooms (Pee Choon TOH & Berinderjeet KAUR)Mathematics Education, Virtues and 21st Century Competencies (Stephen THORNTON)Enriching Secondary Mathematics Education with 21st Century Competencies (WONG Khoon Yoong)Mathematics in 21st Century Life (Barry KISSANE)Mathematics Subject Mastery : A Must for Developing 21st Century Skills (Berinderjeet KAUR, WONG Lai Fong & Divya BHARDWAJ)Teaching in the 21st Century Mathematics Classroom: Metacognitive Questioning (Cynthia SETO)Listening and Responding to Children's Reflective Thinking: Two Case Studies on the Use of the National Assessment in Japan (Keiko HINO)Using Open-Ended Tasks to Foster 21st Century Learners at the Primary Level (YEO Kai Kow Joseph)Productive Talk in the Primary Mathematics Classroom (KOAY Phong Lee)Justification in Singapore Secondary Mathematics (CHUA Boon Liang)Examples in the Teaching of Mathematics: Teachers' Perceptions (Lay Keow NG & Jaguthsing DINDYAL)On the Efficacy of Flipped Classroom: Motivation and Cognitive Load (Weng Kin HO & Puay San CHAN)Use of Comics and Storytelling in Teaching Mathematics (TOH Tin Lam, CHENG Lu Pien, JIANG Heng & LIM Kam Ming)Game Theory: An Alternative Mathematical Experience (Ein-Ya GURRA) Readership: Graduate students, researchers, practitioners and teachers in mathematics.

Written in a lively and unique format, Bob Miller's Math for the New GRE is the perfect study companion for anyone taking the new GRE General. Bob Miller addresses the changes to the content and format of the exam while teaching math in an easy-to-understand style. The book contains everything GRE test-takers need to know to solve the math problems that typify the Quantitative section of the exam. Unlike some dull test prep books that merely present the material, Bob actually teaches and explains math concepts and ideas. His no-nonsense, no-stress style and decades of experience as a math teacher helps students master the material and achieve an excellent score. Each chapter is devoted to a specific topic and is packed with examples and exercises that reinforce the required math skills.
