Patient safety is now a very strong focus of pharmacy degrees. Competency-based evaluations of pharmacy students using simulated assessments including Objective Structured Clinical Examinations (OSCEs) and Criterion Referenced Assessments (CRAs) are increasingly commonplace. These are designed to simulate aspects of real-life pharmacy practice in order to train students to integrate their knowledge of medicinal chemistry, pharmaceuticals, therapeutics, legislation, clinical skills, numeracy, communication and empathy, and to test a student's ability to provide safe and effective patient care. This book provides a unique resource to support students and trainers in developing and practising these essential skills. It is designed as a useful resource for undergraduate students, clinical tutors and those involved in teaching students on pharmacy degree courses. Format OSCE outline Format (written/interactive) Level of difficulty Time limit Props supplied (e.g. BNF) Competencies tested Station task Model Answers and sample marking schemes Tips Short chapter introductions about how to tackle the type of problems encountered in the chapter. Station examples to test your ability to integrate knowledge and skills. Stations written in detail so that you can practise and then check or score performance against model answers. Examples of competency-based assessments designed to assess the level of integration between science and practice.

A student-friendly and practical guide to revision, offering step-by-step instructions for the 10 most commonly assessed skills, example marking sheets, typical examiners questions, and suggested answers to help nursing students achieve success in an OSCE.

Revised and expanded for the second edition, ENT OSCEs is an established full-colour revision guide covering all aspects of the DO-HNS and MRCS (ENT) OSCE. Written by a team of ENT specialty registrars, this accessible text follows a step-by-step approach with each test OSCE station based on the style of past questions. This new edition features more written stations, clinical examination walk-throughs and communication skills stations. With over 100 colour images, ENT OSCEs remains unrivalled as a tool with which to prepare for ENT exams. It is essential reading for candidates of the DO-HNS/MRCS (ENT) and will also aid trainees in preparation for specialty registrar national selection interviews. It is highly recommended for GPs wishing to refresh their knowledge of how to assess common ENT problems and will also be an ideal reference for any junior doctor learning to take histories and examinations in their first ENT post. Finally, it is an invaluable resource for medical students undertaking their ENT attachment and in preparation for final examinations.

Following the familiar, easy-to-use at a Glance format, OSCEs at a Glance 2nd Edition is both a revision guide and a comprehensive introduction to objective structured clinical examinations for medical students. Fully revised to suit the current curriculum, and written with student feedback and experiences in mind, this full-colour textbook contains brand new and comprehensively indexed chapters which include 32 new OSCE stations, covering distinct areas of specialisation as well as broader practical and communication skills covered in the exams. This new edition of OSCEs at a Glance is also supported by a companion website at www.ataglanceseries.com/osces containing downloadable OSCE checklists - perfect for testing knowledge in the run-up to exams. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from Google Play or the MedHand Store.

An up-to-date and comprehensive revision guide specifically for the primary FRCA OSCE written from the perspective of an anaesthetic trainee.

Medical students often feel they understand the theory behind the clinical aspect of medicine but seldom have enough chance to put what they learn into practice. In addition, clinical examinations pose a challenge to students who may be technically and theoretically excellent, but who have poor examination technique. It is quite common for students to lack understanding of how they will be marked, how much emphasis to place upon certain actions or how much detail is expected of them. 'OSCE CASES WITH MARK SCHEMES' is intended to fill this gap. It provides OSCE mark schemes to reflect the real OSCE experience, by encouraging self assessment when practicing the clinical scenarios. The book includes chapters on communication skills, medical ethics, explanation stations, paediatrics and obstetrics and gynaecology subjects which are sometimes neglected elsewhere. All four authors have taken part in medical student teaching and OSCE examinations. They understand what will earn marks in the actual exam. All the OSCE scenarios are from stations previously examined in the UK's top medical schools. This book prepares the student for what the actual finals exam will be like. CONTENTS: SECTION ONE, COMMUNICATION STATIONS - Presenting Complaints - Psychiatry History Taking - Pediatrics History Taking - Obstetrics History Taking - Gynaecology History Taking - Medical Ethics - Difficult Communication Scenarios - Pharmacology - Consenting - Explanation of Management and Results SECTION TWO, PERFORMANCE STATIONS - Examination Skills - Practical Skills - Data Interpretation - Closing Remarks

This book aims to provide an easily accessible quick reference guide for advanced nursing students preparing to undertake practical examinations to assess advanced clinical practice competence, and students preparing for practical examinations in non-medical prescribing assessment. These examinations are commonly known as objective structured clinical examinations (OSCEs). The book is a preparation and revision tool, designed to be read in conjunction with any recommended core clinical textbooks: however, along with giving students step-by-step instructions on performing well in OSCE scenarios, it also gives guidance to academic staff on preparing to teach and mark OSCEs. This book uses a case study approach to OSCEs in a coherent, consistent, and easily understandable style. Both authors are clinical academic nurse practitioners who regularly work in clinical practice in conjunction with teaching advanced nurse practitioner and non-medical prescribing students.

Offers an introduction covering the MRCS exam with particular reference to OSCEs; an overview of clinical skills in history taking and physical examination; chapters covering sections of the exam with popular cases in the OSCE format at the end of each chapter; and, a layout with colour images.
