the dentist. Subjects included in the book are Periodontology, Endodontics, Dental Biomaterials, Oral Biology and Pathology, and Fixed and Removable Prosthodontics. However Restorative Dentistry offers a somewhat unique approach in that it integrates the basic sciences that are fundamental to clinical practice rather than having separate sections or expecting readers to consult other texts for basic information. The integration means that there are not separate sections on the specialist subjects but aspects of these topics are distributed throughout. This second edition is full colour throughout. It has been fully revised with two brand new chapters on Implantology bringing the book up to date with emerging technologies and
