with experimenting with these giant blocks of containers. Aside from trendiness, building container homes have gained a wider interest amongst many because it saves money to construct. As such, several potential homeowners are seeking for homes with lesser construction and maintenance costs. Besides, the perception exists that container homes contribute to recycling initiatives. Containers come in different sizes, such as 10ft, 20ft, and 40ft, with the smallest shipping container providing a floor space of about 100 square feet for a shipping container home. Now imagine when hundreds of micro-apartments made of containers are constructed into a huge apartment building; the sight of such can be an astonishing grab for the eye. But you really don't need to rack up several containers before you can have a decent container home to live in. All you need is the right amount of knowledge and guidance to help you get the best out of your shipping container and have a well-put-together container you can call home. Hence, the reason this book was written. In this book, you will;
