The FreeBSD Git Transition Team is on schedule to complete the project's transition from SVN to Git by December 22nd, 2020. The CURRENT branch has been available via Git for several months and DOCS was transitioned in December. The 11 and 12-STABLE branches will be pushed to SVN from Git until each is end-of-life.

FreeBSD Git Transition Underway - FreeBSDNews.com
FreeBSD has similarities with Linux, with two major differences in scope and licensing: FreeBSD maintains a complete system, i.e. the project delivers a kernel, device drivers, userland utilities, and documentation, as opposed to Linux only delivering a kernel and drivers, and relying on third-parties for system software; and FreeBSD source ...

FreeBSD - Wikipedia
Absolute FreeBSD dives deep into server management, taking you beyond just making things work and into understanding why they work. You'll learn: • How to best install FreeBSD to meet your needs • Which filesystem to use in your environment • How to back up and restore critical data • How to tweak the kernel, and when not to
