questions affects every aspect of your life: personal, public, and spiritual. So it's vital to get the answer right. Pastor and best-selling author Mark Driscoll believes false identity is at the heart of many struggles—and that you can overcome them by having your true identity in Christ. In *Who Do You Think You Are?*, Driscoll explores the question, "What does it mean to be 'in Christ'?" In the process he dissects the false-identity epidemic and, more important, provides the only solution—Jesus. "This book will give you an unshakeable, biblical understanding of who you are in Christ. When you know who you are, you'll know what to do." —Craig Groeschel, Senior Pastor of LifeChurch.tv and author of *Soul Detox, Clean Living in a Contaminated World*

"I spent years in ministry for Christ without understanding my identity in Christ. I know now that I was not alone. When, by the grace of God, we understand who we are in Christ, everything else can crumble and we will still be standing. I highly commend this book to you." —Sheila Walsh, speaker and author of *God Loves Broken People*

'Gets right to the heart of what makes us what we are. Read it!' Angela Saini, author of *Inferior and Superior: The Return of Race Science* The popular science equivalent of *Who Do You Think You Are?* Popular science master Brian Clegg's new book is an entertaining tour through the science of what makes you you. From the atomic level, through life and energy to genetics and personality, it explores how the billions of particles which make up you — your DNA, your skin, your memories — have come to be. It starts with the present-day reader and follows a number of trails to discover their origins: how the atoms in your body were created and how they got to you in space and time, the sources of things you consume, how the living cells of your body developed, where your massive brain and consciousness originated, how human beings evolved and, ultimately, what your personal genetic history reveals.
